CROWN CASTLE

Colocation

With state-of-the-art data centers—colocation facilities all the way down to regen huts—we offer businesses and organizations high-bandwidth, low-latency connectivity to key network destinations and data sources.

Our colocation centers offer a clean, secure environment where you can store all your mission-critical applications right at the network's edge. With fully redundant power and cooling and 24/7 card access to our secure racks, we enable you to limit your points of failure and access your most important functions when you need them, including disaster recovery, business continuity, SaaS, cloud computing, physical redundancy and backup.

Each of our colocation centers is temperature controlled and offers power-ready racks, cabinets and bulk space, giving you a powerful alternative to costly internal data center upgrades.

Key Benefits

Optimized performance and reliability

Our colocation facilities offer carrier-grade high-bandwidth, low-latency connectivity.

Increased flexibility and scalability

You have the ability to add or modify colocation space based on your configuration requirements, with multiple connectivity options. And, we have 100+ colocation facilities strategically located throughout our footprint with connectivity to 900+ data centers, PoPs and COs.

Dedicated support and monitoring

We are a long-term data center operator with a proven track record and Network Operations Center that provides around-the-clock monitoring of our network and data centers.

Key Features

> Flexible space, power and connectivity options
> Backup power
> Environmentally controlled
> Secure access

Key Applications

> Data center operations
> Carrier interconnection
> Disaster recovery/business continuity
> Off-site business applications
